

**Bergerat
Monnoyeur**

CATERPILLAR'S EXCLUSIVE DEALER IN FRANCE
SANDVIK'S DISTRIBUTOR IN FRANCE
40 WORKSHOPS SPREAD THROUGHOUT FRANCE

SAVOYE'S CUSTOMER SINCE 2012

18,000 m2 of floor space

**100,000 references
delivered per year**

**80,000 references
managed in stock**

“ ODATiO will allow us to choose from our ten carriers according to the type of demand, the level of urgency, the locality to be served, the weight of the package, etc. It will therefore be able to assign the best transport scheme while meeting major challenges in terms of costs and compliance with deadlines ”

Stéphane LAGAL

Machines & Spare Parts Supply Chain Director at Bergerat Monnoyeur

TARGETS

**TO INCREASE THE ROBUSTNESS OF ITS
TRANSPORT ORGANIZATION**

**TO OFFER ITS CUSTOMERS THE MOST
ACCURATE PARCEL TRACKING**

**TO MEET MAJOR CHALLENGES IN TERMS OF
COSTS AND COMPLIANCE WITH DEADLINES**

WHY SAVOYE ?

- The clarity and quality of the proposed offer
- The ability of ODATiO and the project team to address our four main needs through a structured approach

DEPLOYED SOLUTIONS

- ODATiO TMS
- LMXT WMS

RÉSULTATS

**ASSIGNMENT OF THE BEST TRANSPORT
SCHEME**

OPTIMIZED TRANSPORT COSTS

**IMPROVED PERFORMANCE MEASUREMENT
AND SERVICE RATE**

**Bergerat
Monnoyeur**

Present in multiple sectors of activity, from public works to landscape design, mining, roads and industry, Bergerat Monnoyeur, the exclusive dealer of Caterpillar and Sandvik in France, ensures the sales of new machinery, short and long-term rental, along with the after-sales service of these products through 40 workshops spread throughout France. These latter thus offer machine troubleshooting, maintenance and rebuild services.

Services that Bergerat Monnoyeur guarantees to its customers thanks to a supply of spare parts from its Saint-Denis logistics platform in the Paris region, via transport flows ranging from D+1 express before 8am to D+2 courier. To ensure all these activities, the Saint-Denis logistics platform relies on its 18,000 m2 of floor space, with approximately 100,000 references delivered per year, including 80,000 managed in stock. As Bergerat Monnoyeur does not possess a Transport Management System, all transport flows were until now managed via its ERP and its Savoye LMXT WMS. Eager to better manage carrier assignments and strengthen its shipping processes, the dealer issued a call for tenders in the summer of 2020 and selected its partner Savoye for the implementation of a dedicated and innovative transport management tool.

Bergerat Monnoyeur thus opted for the new generation software solution for Supply Chain Execution, ODATiO, recently launched on the market by Savoye. The dealer also intends to optimize its costs by controlling its invoices and pre-invoicing. The third reason for this choice is a growing need for shipment tracking.

Another advantage of ODATiO is that it is a full web, responsive solution, accessible from any device, in the Cloud on Microsoft AZURE. It thus benefits from intuitive interfaces and navigation, allowing rapid familiarization with the tool.

Divided into three lots, the TMS roll-out project began with the allocation and estimation of the transport cost of the various express, standard and charter mail flows according to precise rules (weight, place of delivery, time, type of flow). The second lot will aim to integrate and control the carriers' invoices. Finally, the last lot will focus on tracking and performance measurement.
