

FAMILY-OPERATED COMPANY FOUNDED IN 1951
LEADING PHARMACEUTICAL DEPOSITORY

SAVOYE CUSTOMER SINCE 2015

**Platform of 110,000 m²
in Mussy-Le-Neuf**

60,000 parcels / day

30,000 pallet locations

“ Our activity is extremely sensitive. That is why we must use a robust, tried and tested solution... The after-sales services offered by SAVOYE, the maintenance, volumes and delivery times, all satisfied our expectations. ”

Laure BRENAS BAUDRY
CEO of CSP

TARGETS

TO SELECT A **SUSTAINABLE SOLUTION**
LEADING A QUICK ROI

TO OFFER AN **HIGH LEVEL LOGISTICS**
ASSIGNED TO THE PUBLIC HEALTH SERVICE

TO **SUPPORT** THE STRONG GROWTH
OF THE GROUP

WHY SAVOYE?

- A good understanding of the needs and a good cooperation between the project teams
- An agile and performing solution
- High-standard equipment

DEPLOYED SOLUTIONS

- 1 Goods-to-Person GTP X-PTS solution: automated order preparation
- 1 JIVARO machine: optimisation of the volumes and box closing
- INTELIS conveyors: routing of boxes
- Robotic cell: boxes automatic depalletizing

RESULTS

A **FLEXIBLE** SYSTEM ALLOWING
BOTH THE SPLIT CASE
AND FULL BOX PREPARATION

A **ROBUST, ACCESSIBLE AND EFFICIENT**
SOLUTION

BETTER **SERVICE QUALITY** AND BETTER
VOLUME

To satisfy its many customers: pharmaceutical laboratories, wholesale distributors, pharmacies, healthcare establishments, doctors, supermarkets, etc. with constantly improving quality of service and speed of execution, pharmaceutical distributor CSP continuously monitors technological and other developments in its sector. Its objectives: to equip itself with the most appropriate tools to achieve its logistical goals and perform the activity its customers expect.

To do this, CSP deploys significant resources. The company has a total of 200,000 m² of warehouse space in France and Benelux, of which 82,000 m² at its Cournon d'Auvergne site near Clermont-Ferrand, 83,000 m² in Moussy-le-Neuf near Paris, and 15,000 m² in Belgium. The Cournon d'Auvergne site has a SAVOYE person-to-goods order preparation line, which was installed in 2015 and extended in 2017, but the Moussy-le-Neuf site is where the pharmaceutical distributor is currently building a 30,000 m² extension, to be equipped with an X-PTS goods-to-person solution from SAVOYE in 2020.

“ Our ambition was to make a sustainable investment in a lasting technology, with a coherent and acceptable ROI. That is why we carried out an in-depth study of all the existing tools. We found several service providers, including SAVOYE ”, explains Laure BRENAS BAUDRY, pharmacist, CEO of CSP.

Seeking a flexible solution that would provide both retail preparation and complete package preparation, CSP decided to opt for SAVOYE'S goods-to-person shuttle solutions. The designer and integrator of logistics solutions offered to install a robotic solution for the preparation of standard packages, and an automated solution for retail preparation. The facility will include, amongst other things, 600 m of INTELIS plug & play conveyors, two X-PTS aisles, four PICK STATION operator stations, and a robotic layer depalletising solution. It will be able to handle 11,000 additional packages per day, bringing the daily total to 60,000 packages.

“ Our activity is extremely sensitive; it's a matter of public health. That is why we must use a robust, tried and tested solution. Seeing the system in operation for logistics specialists gave us the proof we needed of its efficiency. In parallel, the after-sales services offered by SAVOYE, the maintenance, volumes and delivery times, all satisfied our expectations ”, adds Laure BRENAS BAUDRY.

Due to be operational in June 2020, the solution was also designed to be extensible. Both partners planned for the possibility of installing additional aisles on the X-PTS system and doubling the order preparation and resupply system. ***“ We are experiencing very strong growth. Following Moussy-le-Neuf, a new 28,000 m² extension project has just started in Cournon d'Auvergne (63). We are currently looking into what would be most relevant for the activity to be conducted there. In any case, we hope this partnership will be a long-lasting one ”***, concludes Laure BRENAS BAUDRY.
