

MAGISTOR

**FLEXIBILITY AND ADAPTABILITY,
FAST IMPLEMENTATION,
EASY TO GET USED TO,
WEB MODULE**

SAAS OR ON PREMISE MODE

FOR SMALL AND MEDIUM SIZED COMPANIES

3PL, carriers, specialised distribution, industrial supplies, food industry, healthcare, retail, e-commerce, distance selling, drive...

- wishing to be equipped with complete solution
- looking for multi sites and multi companies solution

which can be easily configured and implemented quickly

BENEFITS?

- Controlling all of your warehouse processes
- Mastering your storage warehouse
- Order preparation optimisation (manual or automated)

CONTEXT

MAGISTOR allows you **to organise all of your logistics site activities, managing both the storage warehouse and the order preparation activity.**

You have a simple, unique tool to control your warehouse, thanks to the automation of the basic goods movements and real time activity follow-up.

MAGISTOR can be interfaced with all of the warehouses technical equipment from radio-frequency terminals to labellers.

STAKES

MASTERING YOUR STORAGE WAREHOUSE

With MAGISTOR, you follow the goods-in progress status up to storage. MAGISTOR integrates the complete management of **stock locations**, taking their different features into account, then ensures goods visibility by all the possible features. MAGISTOR manages the **reserve locations** just like **picking locations**, and constantly seeks to optimise replenishment movements.

ORDER PREPARATION OPTIMISATION

MAGISTOR deals with **all types of preparation: by complete pallet, in full case cartons** as well as and especially **split case preparation.**

Whatever the type of customer order, MAGISTOR allows you to use the means of preparation which is best adapted taking the available equipment into account.

INTUITIVE, CLEAR, USER-FRIENDLY AND EASY TO GET USED TO

MAGISTOR was designed to offer you both **a clear display and flexible browsing.** Whether you are at a workstation or using a mobile terminal, you have all the information you need. The tool is very easy to get used to.

MAGISTOR

1

GOODS-IN

- Integration or constitution of folders for goods to be received
- Qualitative and quantitative check on the goods-in platforms
- Automatic location allocation
- Automatic stock update
