VENTILATION CABINET PUT TO LIGHT

USE

Guide the operator using LED stripes to ventilate products collected upstream in the customer packages placed in the furniture.

- **Indicate** to the operator where to place the product (Put) by lighting the location of the package (to light).
- Rear slot **release**.
- The actions to be carried out are indicated by LED lighting using a colour code.
- **2 banners quantity** per level.
- **Sequential mode:** location lit for only one space or one space per level for picking.
- **Unit mode:** ventilation is carried out piece by piece or for the total quantity of product.
- **Grouping:** possibility of grouping the releases of the locations.
- **OPTION:** release per face.
