

FRENCH SPECIALIST IN THE DISTRIBUTION OF FASTENERS, NUTS AND BOLTS AND FIXING PRODUCTS

SAVOYE WMS USER SINCE 2013

6000 m² of platform

1600 shipments /month

+ 16,000 items in stock

“Our production tool is logistics. Without SAVOYE, the move from the old to the new site would simply have been impossible in such safety times and conditions”

Benjamin POIZAT
VISWOOD Director

TARGET

A SCALABLE WMS SOLUTION TO ABSORB GROWTH

INTEROPERABLE TECHNOLOGY WITH THE ERP SYSTEM

EASY IMPLEMENTATION FOR RAPID MOVE OF THE BUSINESS

RESULTS

OPTIMISATION OF PROCESSES AND PRODUCTIVITY

A WMS CAPABLE OF JUST-IN-TIME MANAGEMENT OF SUB-CONTRACTOR FLOWS

360° VISION OF THE COMPANY'S DATA

WHY SAVOYE ?

- a powerful, scalable WMS
- proximity and support
- a customisable, ergonomic graphic work environment

RESULTS

- Incorporation of a new activity in the WMS
- Turnover **x2**
(BATIFIX external growth)

Since 2013, the steel and stainless steel screws and bolts wholesaler, Viswood, has been using the warehouse management software package maGistor by the editor SAVOYE. The implementation of the WMS solution is part of an overall company re-think. « We've undergone strong growth over the last few years » explains Benjamin POIZAT, Logistics Manager at Viswood. « We had to re-think our logistics because the storage capacity at our old site no longer allowed us to face up to the volume which we needed to develop our activity ».

THE SPECIALIST IN FASTENERS AND NUTS AND BOLTS HAS INSTALLED THE SAVOYE WMS ON ITS SURY-LE-COMTAL SITE (42). OBJECTIVE: INCREASE ITS STORAGE CAPACITY TO MEET ITS STRONG GROWTH.

The trader, who mainly supplies independent ironmongers and large retailers for building industry professionals, developed an important project whose aim was to construct a new building measuring 3.400 m² in Sury-le-Comtal (42), with a surface area which is three times bigger than at the old site. Following the acquisition of Batifix in 2015, an extension expanded the warehouse which covers now an area of 6 000 m². The project also involved being fitted with warehouse management software which would allow the flows of 15 000 references in the catalogue, which until now had been managed by stock management IT, to be optimised.

« To choose the WMS, we compared the various offers on the market even though we already knew the editor SAVOYE well; their headquarters are in Saint-Etienne which is just a few kilometres from our new site» states Benjamin POIZAT. « But setting this point aside, SAVOYE impressed us by their listening skills, accompaniment and involvement in this project ».

The WMS now enables Viswood to receive goods from its suppliers, check them and store them at over 8.000 available pallet locations, then package them under the company's name and dispatch them. 10 to 15 tonnes of goods are thus delivered every day throughout France to ironmongers and distributors. « Our production tool is logistics. Without SAVOYE, moving from the old site to the new one respecting the tight deadlines and safety conditions would quite simply not have been possible», he concludes.
