- Team availability

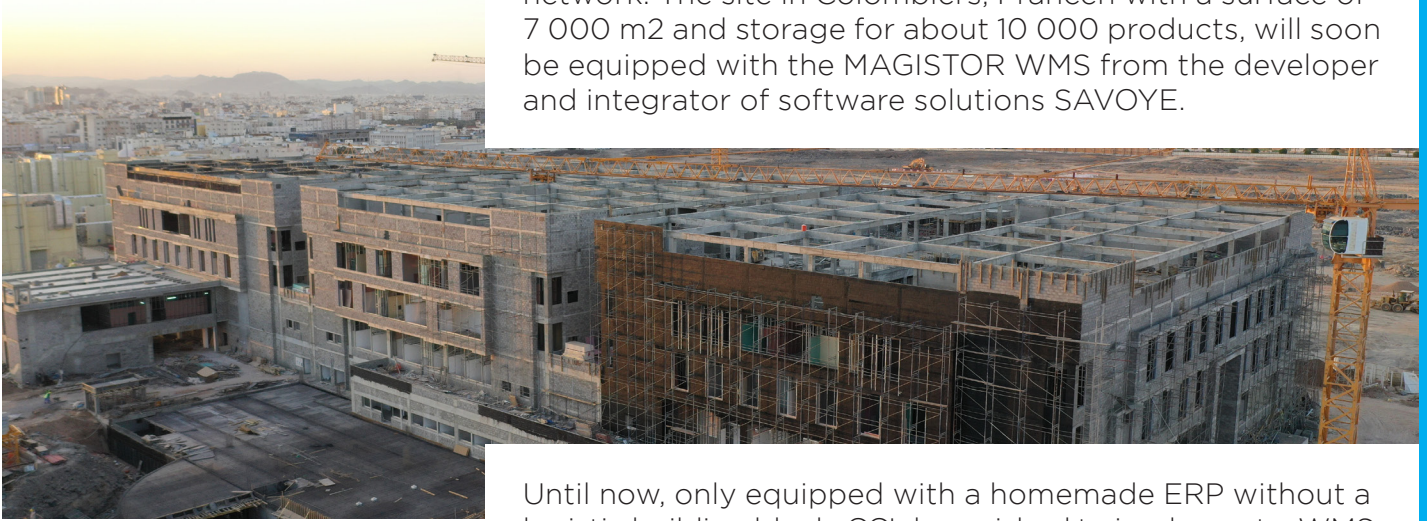

Laurent COLONNIER
Logistics Manager for
Comptoir Commercial du
Languedoc

“ SAVOYE immediately seduced us with their professional knowledge, their references and their professionalism. From the beginning the team showed their interest in our organization and our tools. Therefore we have chosen the MAGISTOR WMS to equip our new platform. ”

Steel, materials, covering, carpentry... Comptoir Commercial du Languedoc (CCL) daily supplies its professional private customers in the field of structural and finishing work. With already about 40 storage sites, CCL has acquired in October 2018 a logistic platform to feed the total of its regional network. The site in Colombiers, France with a surface of 7 000 m² and storage for about 10 000 products, will soon be equipped with the MAGISTOR WMS from the developer and integrator of software solutions SAVOYE.

COMPTOIR COMMERCIAL DU LANGUEDOC (CCL), A TRADING COMPANY SPECIALIZED IN THE SALES OF PRODUCTS FOR THE INDUSTRY AND CONSTRUCTION, HAS PUT ITS FAITH IN THE DEVELOPER AND INTEGRATOR OF SOFTWARE SOLUTIONS SAVOYE, FOR THE EQUIPMENT OF ITS NEW LOGISTICS PLATFORM IN THE OCCITAN REGION IN THE SOUTH OF FRANCE.

Until now, only equipped with a homemade ERP without a logistic building block, CCL has wished to implement a WMS, capable to ensure the management of its supply chain in a secured and optimized way:

« We searched for a partner that could accompany us in not only in our expansion, but also in our opening of new distribution channels for e-commerce », explains Laurent COLONNIER, Logistics Manager for Comptoir Commercial du Languedoc.

After having launched a request for proposal in October 2018, CCL has finally met SAVOYE through recommendations coming from the organization for group purchases of which they are a member. « SAVOYE immediately seduced us with their professional knowledge, their references and their professionalism. From the beginning the team showed their interest in our organization and our tools. Therefore we have chosen the MAGISTOR WMS to equip our new platform », precises Laurent COLONNIER.

MAGISTOR that is in the course of integration, will soon cover all the logistic processes of CCL from reception through expedition, together with an extensive stock coverage. This is an project which assures the company about 100 expeditions per day with an optimized quality of service. This installation of the tool for the management of the warehouse MAGISTOR foreseen to be operational by next summer, will probably be followed by other projects: « SAVOYE has been able to prove its expertise. We are thinking about the implementation of other solutions such as LM Label, LM TMS as well as LM Order Manager », entrusts Laurent COLONNIER us.
