WHY SAVOYE?

- Innovative, scalable solutions
- Customized expertise and advice
- Expected productivity gains

RESULTS

**TRIPLING OF PREPARED
LINES/HOUR**

**REDUCTION IN WORK-
RELATED ACCIDENTS**

TRANSPORT SAVINGS

Dimitri Devillers

Supply Chain Manager
Forezia Snacking

SAVOYE solutions enable us to optimize our logistics and guarantee quality service to our customers. They also meet our HR challenges, facilitating our growth.

Forezia Snacking, a major player in food distribution for fast-food outlets, has chosen to work with SAVOYE to modernize and optimize its supply chain.

The company, which ships 10,000 parcels daily from its warehouses in Chasse-sur-Rhône, has had to upgrade its processes to keep pace with increasing volumes and maintain a high level of service quality.

**LOGISTICS
MODERNIZATION:
FOREZIA SNACKING
CHOOSES SAVOYE TO
SUPPORT ITS GROWTH.**

Faced with saturation of its fresh/dry warehouse and the opening of a new warehouse dedicated to frozen foods in 2024, Forezia Snacking opted for an innovative, scalable solution offered by SAVOYE. This collaboration, initiated in 2018, has resulted in the installation of the ODATiO WMS, an automated order-picking system and the JIVARO packaging machine.

SAVOYE solutions are currently being installed, and should be operational at the site by spring 2025. “We’re expecting major gains in productivity (from 50 to 150 picking lines per hour), reliability (thanks in particular to weight control) and, last but not least, the ability to offer our customers a unique level of service quality,” explains Dimitri Devillers, Supply Chain Manager at Forezia snacking. “The project also addresses important HR issues. The SAVOYE solutions should help reduce the risk of accidents and musculoskeletal disorders in order preparation, thus facilitating on-site recruitment. Last but not least, the JIVARO solution will lead to significant savings on the transport side, reducing empty transport”, he continues.

SAVOYE was able to offer a solution perfectly adapted to the needs of this family business, while anticipating its future logistics challenges.
