

CUSTOMER STORY

VISWOOD, a specialist in steel and stainless steel fasteners, restructured its logistics to support business growth. By implementing SAVOYE's WMS, the company now optimizes the management of its 6,000 m² warehouse, ensures smooth operations, and strengthens performance for its professional building-sector clients.

TARGETS

- 01 A scalable WMS solution to absorb growth
- 02 Interoperable technology with the ERP system
- 03 Easy implementation for rapid move of the business

WHY SAVOYE?

- A powerful, scalable WMS
- Proximity and support
- Customisable, ergonomic graphic work environment

RESULTS

OPTIMIZATION OF PROCESSES AND PRODUCTIVITY

A WMS CAPABLE OF JUST-IN-TIME MANAGEMENT OF SUB-CONTRACTOR FLOWS

360° VISION OF THE COMPANY'S DATA

Benjamin POIZAT
VISWOOD Director

Our production tool is logistics. Without SAVOYE, the move from the old to the new site would simply have been impossible in such safety times and conditions

Steel and stainless steel fasteners wholesaler VISWOOD implemented SAVOYE's warehouse management system (WMS) as part of a comprehensive logistics strategy. Faced with rapid business expansion, the company expanded its operational capacity by building a new 3,400 m² warehouse in Sury-le-Comtal (42), tripling its previous storage surface.

This transformation included the deployment of a WMS to manage the 16,000 catalog items more efficiently, replacing a basic stock management system. The tool now enables structured goods receiving, inspection, storage across more than 8,000 pallet slots, in-house packaging under VISWOOD's brand, and daily nationwide shipping.

OPTIMIZED LOGISTICS TO SUPPORT GROWTH AND STREAMLINE OPERATIONS

Following an acquisition, the facility was extended to 6,000 m². VISWOOD primarily serves independent hardware retailers and major professional distribution chains. Between 10 and 15 tons of goods are shipped each day across France.

SAVOYE's solution was chosen after evaluating various market offerings, not only for geographic proximity, but especially for the team's responsiveness, support, and commitment. The WMS has since enabled VISWOOD to secure and streamline its logistics flows, ensuring smooth and efficient operation of its production backbone.
