

CUSTOMER STORY

[#industrialsupplies](#)[#software](#)

VISWOOD, a specialist in steel and stainless steel fasteners, restructured its logistics to support business growth. By implementing SAVOYE's WMS, the company now optimizes the management of its 6,000 m² warehouse, ensures smooth operations, and strengthens performance for its professional building-sector clients.

TARGETS

- 01 A scalable WMS solution to absorb growth
- 02 Interoperable technology with the ERP system
- 03 Easy implementation for rapid move of the business

WHY SAVOYE?

- A powerful, scalable WMS
- Proximity and support
- Customisable, ergonomic graphic work environment

RESULTS

OPTIMIZATION OF PROCESSES AND PRODUCTIVITY

A WMS CAPABLE OF JUST-IN-TIME MANAGEMENT OF SUB-CONTRACTOR FLOWS

360° VISION OF THE COMPANY'S DATA

Benjamin POIZAT
VISWOOD Director

“Our production tool is logistics. Without SAVOYE, the move from the old to the new site would simply have been impossible in such safety times and conditions.”

The steel and stainless-steel fasteners wholesaler VISWOOD has implemented SAVOYE's warehouse management system (WMS) as part of a comprehensive logistics strategy.

OPTIMIZED LOGISTICS TO SUPPORT GROWTH AND STRUCTURE FLOWS

Faced with strong business growth, the company needed to scale its operational capabilities, notably by building a new 3,400 m² warehouse in Sury-le-Comtal (Loire), tripling the surface area of its previous facility.

This transformation project included the integration of a WMS to provide more precise management of the 16,000 catalogue references, which were previously handled using a standard inventory system. The tool now enables structured receipt of goods, quality control, storage across more than 8,000 pallet locations, and packaging under VISWOOD's own brand before dispatch.

Following an external growth operation, the warehouse was expanded to 6,000 m². VISWOOD's logistics operations serve a customer base mainly composed of independent hardware dealers and major retail chains specializing in professional construction supplies. Each day, between 10 and 15 tonnes of goods are prepared and shipped across the country.

SAVOYE's solution was selected after a thorough market analysis, not only for its geographic proximity but above all for the quality of support, attentiveness, and involvement shown throughout the project. The WMS integration has helped structure and secure all logistics flows, ensuring a smooth and efficient operation of the new facility.
