

CUSTOMER STORY

[#industrialsupplies](#)[#software](#)[#WMS](#)

Comptoir Commercial du Languedoc (CCL), a trading company specializing in the sale of products for industry and construction, has entrusted SAVOYE with equipping its new logistics platform located in the Occitanie region.

TARGETS

- 01 Optimize supply chain management
- 02 Open new distribution channels
- 03 Improve customer service

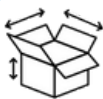

WHY SAVOYE?

- Industry knowledge, references, and professionalism in the field of logistics software
- An adaptation to CCL's needs, demonstrating the ability to meet the company's specific requirements

RESULTS

IMPROVEMENT IN SERVICE QUALITY

INCREASE IN SHIPPING CAPACITY

SECURE MANAGEMENT OF ALL LOGISTICAL PROCESSES

Laurent COLONNIER
Logistics Manager CCL

"SAVOYE immediately impressed us with its industry knowledge, references, and professionalism. Its teams quickly showed a keen interest in our logistical organization and tools."

CCL HAS ENTRUSTED
SAVOYE TO EQUIP ITS
NEW LOGISTICS
PLATFORM LOCATED IN
THE OCCITANIE REGION.

Steel, materials, roofing, carpentry... Comptoir Commercial du Languedoc (CCL) supplies its clients in Occitanie daily for both major and finishing works. With about forty depots, CCL has acquired a 7,000 m² logistics platform in Colomiers (31), housing nearly 10,000 products and equipped with SAVOYE's WMS.

CCL aimed to implement a WMS to ensure a secure and optimized management of its supply chain: "We sought a partner to assist us in our development and also in opening new distribution channels such as e-commerce," explains Laurent COLONNIER, Logistics Manager at CCL.

After issuing a call for tenders, CCL eventually met with SAVOYE based on recommendations from the purchasing group of which it is a member. "SAVOYE immediately impressed us with its industry knowledge, references, and professionalism. Their team showed genuine interest in our logistics organization and tools. We thus chose SAVOYE's WMS to equip our new platform," details Laurent COLONNIER.

The WMS will soon cover all of CCL's logistics processes, from receiving to shipping, including inventory management. This implementation will ensure about a hundred daily shipments and optimized service quality. The WMS deployment may also be followed by additional projects: "SAVOYE has demonstrated its expertise. We are considering implementing other solutions such as Label, TMS, and OMS," adds Laurent COLONNIER.
